

CHRISTIAN PEACEMAKER TEAMS

Iraq in Focus: Profile of an Iraqi Girl

NAME: Sima Abdul Razak

AGE: 11

HOME: Baghdad

LANGUAGE: Arabic

RELIGION: Muslim

FAVORITE SUBJECT: Arabic reading and grammar

FAVORITE FOOD: Gass (roasted meat, usually mutton or chicken, sometimes beef)

LIVING SITUATION: Lives with her mom

PARENTS' WORK: Sima's mom was a kindergarten teacher but now she is retired

BROTHERS AND SISTERS: 1 brother, 1 sister, both older than her and no longer living at home

FAVORITE HOBBY: Drawing

WHAT SHE WANTS TO BE WHEN SHE GROWS UP: A teacher

HOW SIMA WAS AFFECTED BY THE WAR:

The situation in Iraq is bad. One of Sima's cousins was killed by insurgents, and another cousin was injured recently. He went out to buy a joystick for PlayStation and was passing by a gas station when a bomb exploded. He was wounded with shrapnel from the bomb.

Sima had another cousin who was injured during the active part of the war. Also, there are lots of other problems like the electricity. Sima's family only gets about two hours a day of electricity. It's very hot without a fan, or cold water, or air conditioning.

WHAT SIMA WOULD LIKE TO SAY TO KIDS IN THE U.S.: "I'd like to go to the U.S. because I hate Iraq now. I'm upset from the bombs, and I just want to leave."

THE PHOTO ABOVE: Sima with her dog's new puppies

Voice of a Military Mother: Kathy Allwein

Lebanon, Pennsylvania

My son, Tony, is in the Army. His job was in communications but as he found out, during a war you are used wherever the military needs a body. He directed traffic in Baghdad and also was a rear gunner on a daily patrol. Now he is stationed in Frederick, Maryland.

I never understood the Bush administration's reasons for this war and have been against it from the beginning. After reading the web site of Military Families Speak Out, I knew I wanted to be a part of this group. They are military families and people with a direct connection to the war.

If I were president, I would withdraw our troops immediately. We are the cause of the chaos over

there, not the solution to it. Since we created this mess, we must pay to rebuild the country, and the Iraqi people should be hired to rebuild it, not American workers.

My son joined the army, as most young people do, out of a sense of duty to his country. While the intentions of those

who join the military are indeed honorable, they are not always treated honorably. My son was

promised that his student loans would be paid as part of his contract. After he returned from Iraq, he was told his loans do not qualify for the repayment program because they are non-government loans.

For more information on Military Families Speak Out, go to www.mfso.org

“IF I WERE PRESIDENT, I WOULD WITHDRAW OUR TROOPS IMMEDIATELY.”

LEARN A LITTLE ARABIC:

“peace” in Arabic writing

Hello:	salaam alaykum
How are you?	shlonek (for a boy) shlonitch (for a girl)
School:	madrassa
Dog:	chelab
Cat:	bizuna
Peace:	salaam

Iraq Quick Facts

Total area:	437,072 square kilometers, (two times the size of Idaho)
Population:	23.3 million people (about the population of Texas)
Capital:	Baghdad
Religions:	Muslim 97% (Shi'a 65%, Sunni 35%). Christian or other 3%
Major languages and cultural groups:	Arabic, Kurdish, Assyrian, Armenian
Major exports:	Oil

The War & Occupation of Iraq

When it started:	March 20, 2003 when the US invaded
US troops in Iraq:	140,000
US soldiers killed:	1,911
US soldiers wounded:	14,641
Iraqi civilians killed:	100,000
Cost of war:	Taxpayers in the US will pay \$204.6 billion for the cost of the war in Iraq, and maybe more.

For the same amount of money, the following could have been provided:

46,458,805	People Receiving Health Care or
3,545,016	Elementary School Teachers or
1,841,833	Affordable Housing Units or
24,072	New Elementary Schools or
3,525,313	Music and Arts Teachers

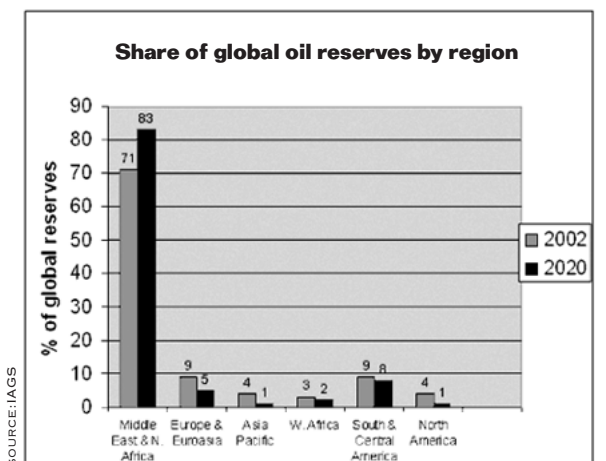

Iraq's water system was destroyed by the bombing. Families find water where they can

An Oily Affair

We find petroleum (oil) products in every area of our lives. They are in the gasoline we use to fuel our cars and to heat our homes. Oil is also used to make plastics and lots of other products. Oil products contribute about 40 percent of the energy used in the United States. Currently, most of the oil used by the industrialized nations is imported from the Middle Eastern countries. It is estimated that there are enough crude oil reserves to last the world about another 60 years. More than half of that amount is located in the Middle East in countries such as Saudi Arabia, Kuwait, Iran, and Iraq.

The US consumes the largest amount of oil in the world and four times the amount of the next largest oil consumer, Japan. But the US has less than 5 percent of the world's population. Most of our oil goes into cars and trucks. Many top officials of the Bush administration worked for oil companies, including President Bush himself. Chevron oil company once named a tanker after Secretary of State Condoleezza Rice to thank her for her work to benefit the company.

Hurricane Stories

THE RESCUE

THERE are many first-hand reports of various relief organizations being refused entry into New Orleans by bus and boat. Despite this, regular, everyday folks wanted to help. They illegally entered the city and helped save thousands of people.

Jabbor Gibson, 18 "jumped aboard the bus as it sat abandoned on a street in New Orleans and took control." stated Houston NewsChannel 5, "The teen packed it full of complete strangers and drove to Houston." The young man declared "'I don't care if I get blamed for it, as long as I saved my people."

THE SUPERDOME:

The Superdome sports arena was where 24,000 hurricane refugees stayed. People thought they could weather the storm in safety in the Superdome. But the ceiling broke open and hurricane winds tore off

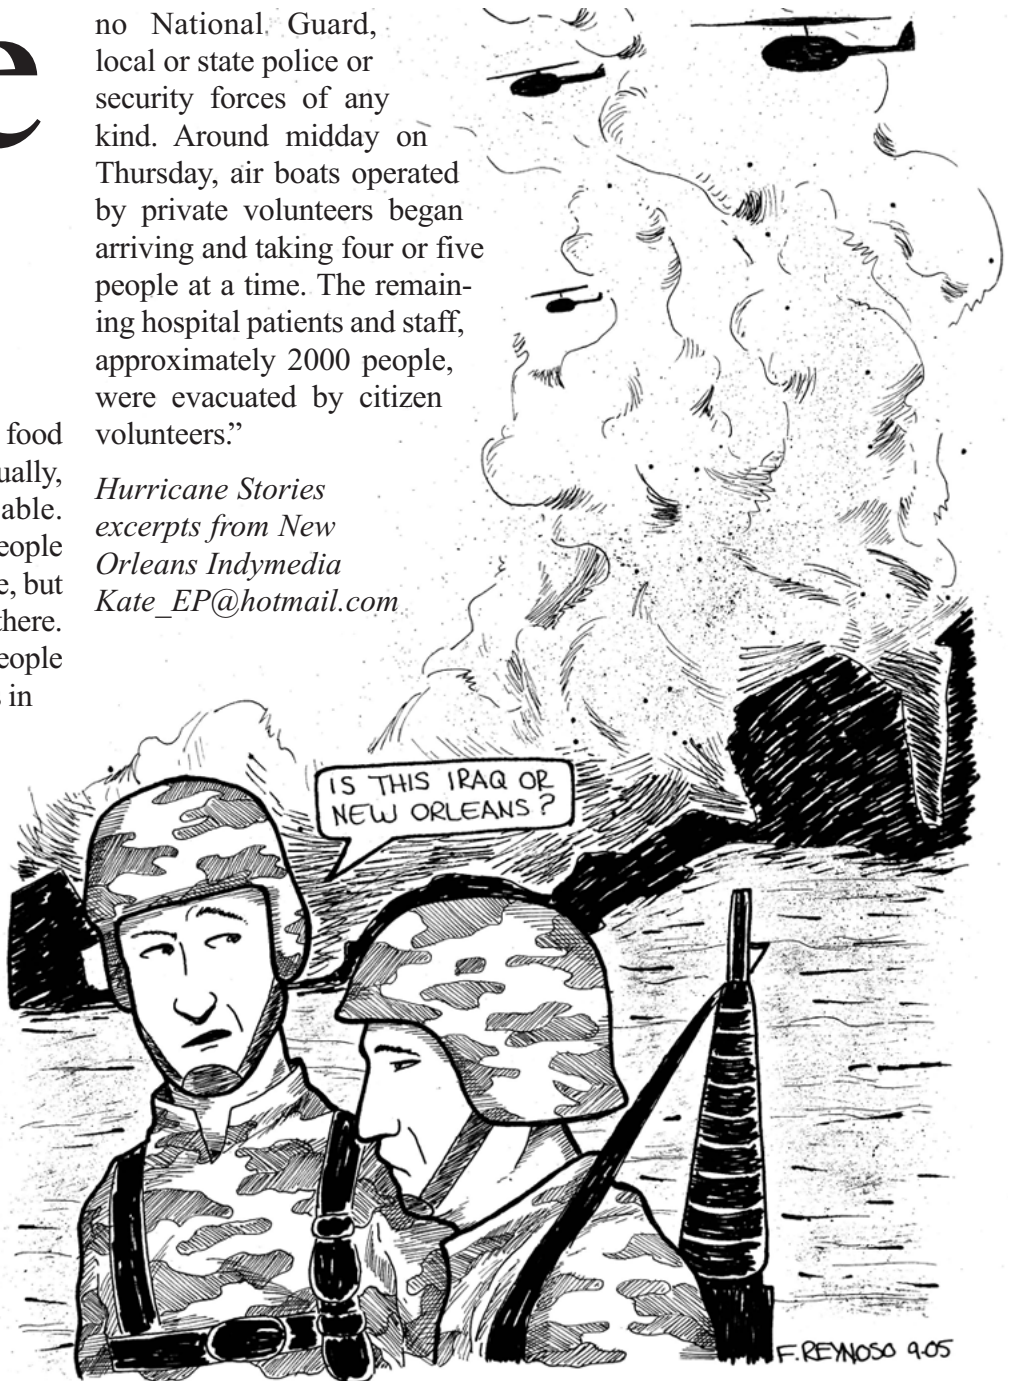

the roof. There was not enough food and water for everyone. Eventually, even the toilets were unusable. According to Malik Rahim, "People were told to go to the Superdome, but they have no food, no water there. And before they could get in, people had to stand in line for 4-5 hours in the rain because everybody was being searched one by one at the entrance."

A HOSPITAL

Bill Quigley was volunteering at Memorial Hospital, where his wife, Debbie, works as a doctor. They write, "The power went out early Monday. The sickest patients were evacuated by helicopter Sunday. As the hours and days wore on and no help came, floodwaters continued to rise. Medication and supplies ran out." Quigley says he saw

no National Guard, local or state police or security forces of any kind. Around midday on Thursday, air boats operated by private volunteers began arriving and taking four or five people at a time. The remaining hospital patients and staff, approximately 2000 people, were evacuated by citizen volunteers."

Kate_EP@hotmail.com*

\$ How you can help! \$

When the government fails the people, regular people step in to provide for basic needs. Here are some grassroots organizations that are providing relief to the victims of Hurricane Katrina:

THE PEOPLE'S HURRICANE FUND
C/o The Young People's Project
99 Bishop Allen Dr.
Cambridge, MA 02139

A fund directed and administered by New Orleans evacuees.

**FRIENDS AND FAMILIES OF LOUISIANA
INCARCERATED CHILDREN**

FFLIC HURRICANE RELIEF FUND
920 Platt Street
Sulphur, LA 70663
www.fflic.org

A statewide grassroots organization dedicated to creating a better life for Louisiana's youth.

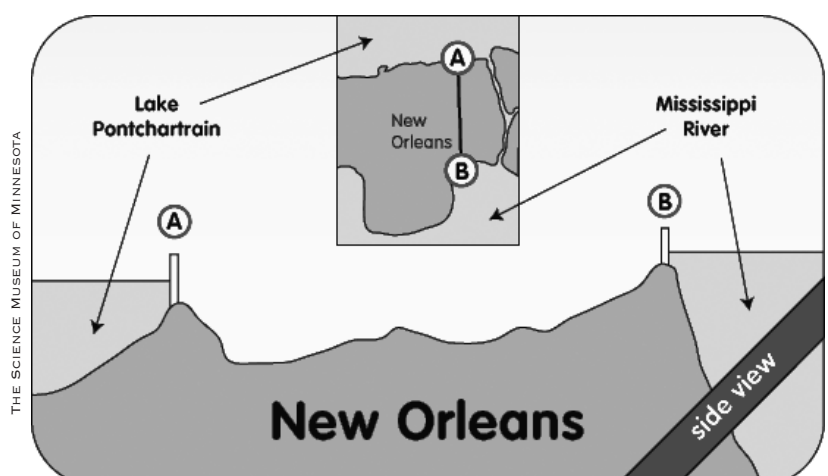

MALCOLM X GRASSROOTS MOVEMENT
388 Atlantic Ave, 4th Fl
Brooklyn, NY 11217-1703
718-254-8800

Based in the African-American community and with branches in the South, they are building aid networks independent of government.

LEVEES are like the edges of a bowl floating in water. New Orleans is a city inside the bowl. The edges of the bowl hold the water back. Despite years of warnings that the levees protecting New Orleans would fall during a severe hurricane, \$65 million in federal construction funds were cut. The levees broke during Hurricane Katrina and the city flooded.

Who lives in New Orleans

Population:	444,515
African-American:	68%
White:	28%
Public school students who are African-American:	96%
Poverty rate:	28%

News Briefs:

TV Time

The average child in the US sees about 40,000 tv commercials a year.

—"Consuming Kids" by Susan Linn.

Junk Food Troubles

Children in the US are consuming more calories between meals than they ever have. A generation ago, kids got less than 20 percent of their daily calories from snacks. Today, it's about 25 percent and rising.

—Barry Popkin, Ph.D., professor of nutrition at the University of North Carolina School of Public Health

More are Poor this year

The number of poor Americans rose by 1.1 million last year with a total of 37 million people now living in poverty. But the wealthy are doing better than ever. For every dollar a worker earns, the average CEO (Chief Executive Officer) earns \$431.

—Institute for Policy Studies and United for a Fair Economy

Bush Unpopular

GEORGE W. BUSH has entered the ranks of the most unpopular presidents in history. The Gallup opinion poll puts his disapproval rate at a soaring 56 percent. At the height of the Watergate scandal, Nixon hit 66 percent. But Republicans give Bush a 90 percent approval rating.

Hurricane Katrina

BOY AND PET DOG 'SNOWBALL'

On September 1, 2005, a little boy and his dog awaited their turn to board a bus to transport Hurricane Katrina victims from the New Orleans Superdome to the Astrodome in Houston. As the boy attempted to board the bus, a police officer took the child's dog away from him. The boy, whose whereabouts are unknown, was forced to leave without his beloved dog. For more information about missing pets visit www.katrinafoundpets.com

Hurricane Babies

There are many sick babies and pregnant women endangered by Hurricane Katrina and its aftermath, including many of the people who were evacuated. For example, about 100 sick and premature babies from hospitals in New Orleans and Mississippi were airlifted or transported to a neonatal intensive care unit at Women's Hospital of Baton Rouge, Louisiana.

Democracy in Action

GARY MARTIN

This fall US citizens have the chance to vote. Voting is just one small part of a functioning democracy. A democracy is a government ruled by the common people, not just a few wealthy people. In addition to voting, what are some other ways in which the people participate in a democracy?

- a) Writing a letter to the editor of a newspaper
- b) Writing or calling a government official about an issue
- c) Building and being part of a group or organization
- d) Signing a petition or gathering signatures for a petition
- e) Holding a rally or demonstration
- f) All of the above

What is your answer?

Do you think the United States is a democracy?

Write to Indy Kids at indykidsletters@indymedia.org.

Youth Fight for the Right to Vote

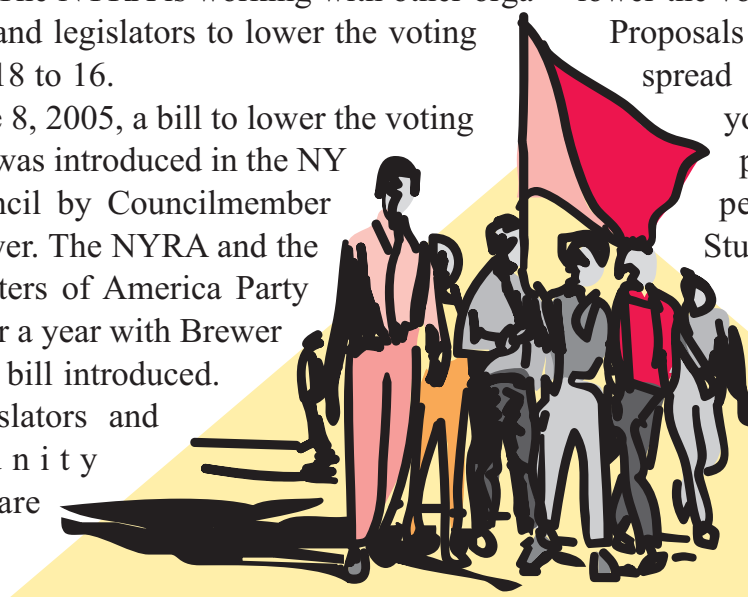

HOW many more years do you have to wait before you can vote? Too long say many including the National Youth Rights Association (NYRA). The NYRA is working with other organizations and legislators to lower the voting age from 18 to 16.

On June 8, 2005, a bill to lower the voting age to 16 was introduced in the NY City Council by Councilmember Gale Brewer. The NYRA and the Future Voters of America Party worked for a year with Brewer to get this bill introduced. Now legislators and community activists are working to build

support to pass the bill.

There are also active campaigns in the California Bay Area and Olympia, Washington to lower the voting age to 16.

Proposals to lower the voting age enjoy widespread support. Many believe that if more youth can vote, it will increase voter participation and give greater voice to people who work and pay taxes. Studies and polls show that youth want to vote, and that they know more about politics and government than adults do. In the words of Rosa Pleasant, age 9, "Yes, I want to vote. My vote could change the world."

ANSWER TO MYSTERY PERSON:
SOJOURNER TRUTH

RECESS OUT:

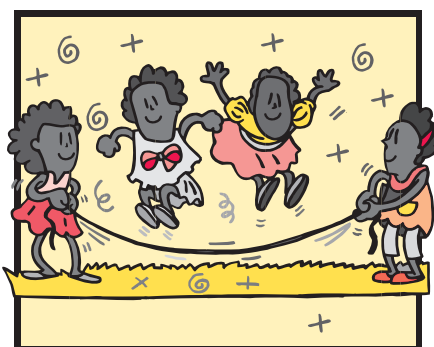

Kids Without A Break

EVERYONE likes recess. It is the special part of the day devoted to sports, games, or any other kind of fun. But is it on its way out? Children in the United States receive less recess time than did their parents, and in the future are facing an even smaller amount.

Children in the US also receive less recess time than other children around the world.

Some British schools have three daily recess periods, 15 minutes in both the morning and afternoon, and 80-90 minutes at lunch. Japanese

schools give 10-20 minutes between lessons or 5-minute breaks between lessons with a long play period after lunch. Recess isn't just a break from math problems and history lessons. Children who receive recess benefit from outdoor play, exercise, freedom to do as they please, and the chance to spend time with their friends. Adults get breaks when they

"Imagination is more important than knowledge." —ALBERT EINSTEIN

work at jobs, so shouldn't children when they work at school?

Because of the US government's decision to toughen the country's coursework (called the No Child Left Behind Act), almost half of US schools have either reduced or banned recess. A number of US school districts have opted for a no-recess policy altogether. However, many experts say that recess has value and cannot be abandoned without loss to the school, and most importantly, the children.

One teacher says, "As a parent I know that my child was happier and less cranky when she had a positive playground experience during the day. As a teacher, I know there are times when it's the playground experiences which make my kids want to try harder in the classroom. They need recess."

Berkeley Hall School in Los Angeles, California, brought back recess after it was eliminated in 1998 for 1st and 2nd graders. They replaced it with Physical Education (P.E., or gym class). The children rebelled. Second grade teacher Vicki Murphy said, "The kids need unstructured time where they can make up their own rules."

MORE GARDENS! MORE TREES! New York City has got to BREATHE!

— a cheer from the More Gardens! Coalition

The over 600 community gardens scattered across New York City are valuable—but they are worth more than money.

One of the most interesting facts about New York City's community gardens is that most of them were once abandoned areas filled with garbage. They were often disgusting and dangerous places. Then, the community got together to create gardens in order to make their neighborhoods safer and more beautiful. Everyone had fun while they worked.

The fairytale stopped there. Until recently, all of New York City's community gardens were in danger of being bulldozed and replaced with buildings. But many people, including children, came together in different ways to save the gardens. The effort was impressive, however, New York City still needs more green spaces to grow healthy food and improve the polluted air.

One reason community gardens are important is that New York City has some of the highest asthma rates in the world. That's because asthma, a condition making it difficult for a person to breathe, is sometimes

caused by polluted and dirty air. Outside of cities, plants and trees help keep the air clean. But inside cities, and particularly in large ones like New York City, plant life is too scarce to be able to do its job.

Community gardens also sometimes grow fresh organic food for people to eat. Organic food is food grown without any chemical pesticides. Pesticides kill insects and other small creatures that might eat the plants, but in large amounts many pesticides can be harmful to human beings.

If you are inspired and excited by the idea of community gardens and interested in getting involved, get a parent, teacher, grandparent, aunt, uncle, or friend to take you to a garden where you can help out, and maybe even have your own garden plot.

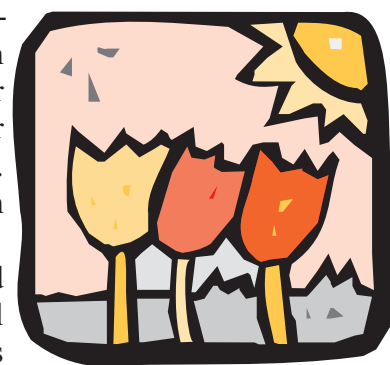

Here are helpful websites you can use to find a community garden near you:

www.greenguerillas.org/ (click on Find a Garden)

www.moregardens.org

www.greenthumbnyc.org

Or, call Greenthumb at (212) 788-8070 and ask about gardens near you.

Do I Consent to This Search?

The founders of the United States were very distrustful of government. This is why they wrote the Fourth Amendment to the US Constitution. It guarantees that people and the things they own are protected from "unreasonable searches." Searches may only be conducted with a warrant: a document that shows that there is a good reason to search. A person's right to privacy is one of our most basic rights and it helps define what it means to be free in the United States.

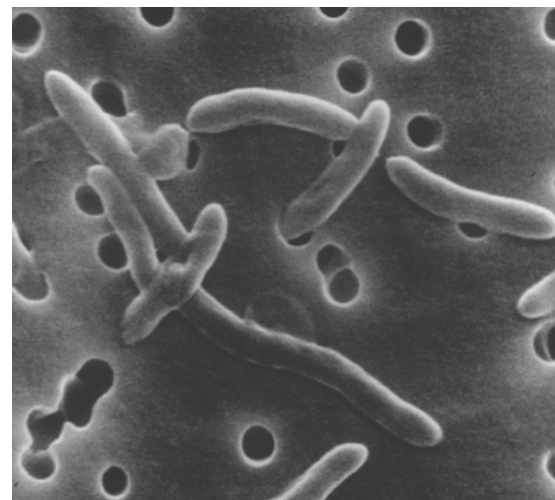

But on July 21, 2005, the New York City Police Department started searching bags carried by people into the subway and train system. This was in response to the bombings in the London, England subway system. And a poll found that the majority of New Yorkers feel that the searches are a good thing.

Safety on public transportation is important, but will the police searches make us safer or just less free? What do you think? Write a letter to Indy Kids at

indykidsletters@indymedia.org For more information, go to: www.nyclu.org

Do You Believe in Magic?

IOWA STATE UNIVERSITY

The Abilities of the Unseen Microbial World

WHAT are neither plant nor mammal nor rock? What causes toothaches, smells like rotten eggs, and eats flesh, but is also used to clean up oil spills and to produce electricity out of sewage? Not visible to the eye, these creatures live not only in the manure of a cow, but also in boiling water. Some scientists

into many different types with many different functions. Very few bacteria species have even been given a scientific name because there are just so many of them. There are more than 15,000 bacteria species found on the planet earth, from Antarctica to the hot springs in Yellowstone to the deep, dark, and very cold sea.

The bacteria that your parents most likely talk about are the microbes that cause diseases: the pathogenic bacteria. These nasty microbes can lead to a number of diseases: dental cavities, acne, food poisoning, tetanus, and scarlet fever are only a few of the diseases caused in humans by bacteria.

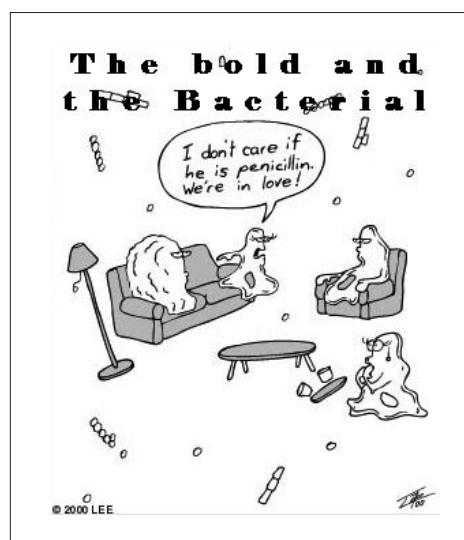

However, while “bad” bacteria get lots of attention, there are many good bacteria that help humans out in nature and also through manipulation by scientists. From termites to cows to humans, bacteria help aid food digestion for animals by breaking down molecules that the stomach itself could not. In fact, microbes breaking down the food molecules produce the gas that is passed from farting or belching.

But that’s not all bacteria do! Bacteria are used to make healthy foods like yogurt, to produce some of the most powerful medicines, and to also break down garbage created by humans. A sturdy group of bacteria have been found to be able to break down certain toxic substances like oil without them-

selves dying. Certain bacteria, which can be incredibly resilient in the harshest of conditions, are able to break down toxic waste products into harmless byproducts and can even be manipulated by scientists to produce the earth’s life-giving gas, oxygen.

Scientists are also studying bacteria in the hopes of finding new medicines and of discovering more about how life may

have developed on this planet. How can you learn more about this magical world? Ask your teacher and parents about science news magazines, web sites, or other sources you could use to keep up with what’s happening. Stay curious and inquisitive about the world around you, as there are many magical things not immediately obvious to our eyes!

even believe these organisms to be space travelers!

No, they are not evil aliens with superior intelligence. Instead, teeny tiny bacteria are responsible for all of the above! You can find these small living organisms (also called microbes) just about everywhere: in water, air, soil, plants, animals, and even inside human beings.

Having spent approximately 3.5 billion years on the planet earth, bacteria have developed

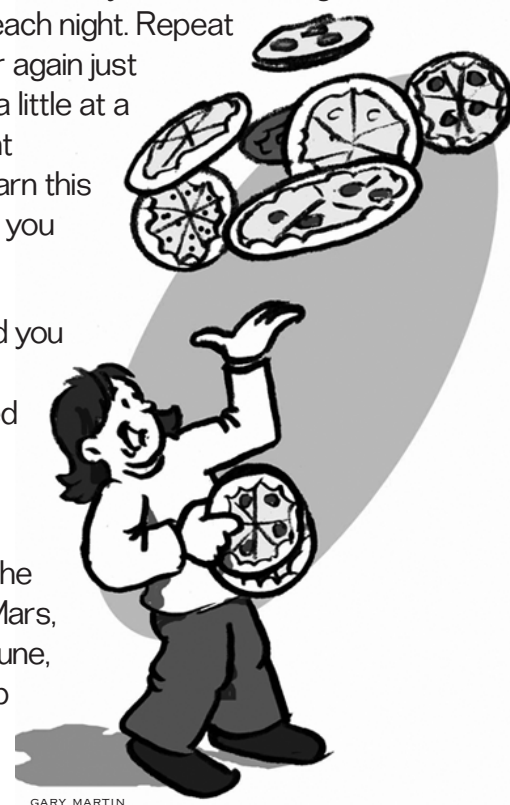

SURVIVING SCHOOL: STUDY TIPS

Learning is a lot of work! But there are ways to make the job easier so that you can remember things and not spend too much time studying.

■ **REPEAT:** You hear a song and want to learn the words. What do you do? You listen to the song over and over again, singing along each time you hear it. Soon you can sing it all by yourself. You can do the same thing when you study by saying or writing down the things you need to learn over and over.

■ **A LITTLE AT A TIME:** If you have a test, it helps to start studying for it the week before! Take your notes and go over them about twenty minutes each night. Repeat the information over and over again just like the words to a song. Do a little at a time rather than a lot the night before the test. When you learn this way you will remember what you learned for a long time.

■ **A SILLY SENTENCE:** Did you know that “My Very Exceptional Mom Just Served Us Nine Pizzas?” It’s a silly sentence but it can help you remember the names of the planets as they go out from the sun: Mercury, Venus, Earth, Mars, Jupiter, Saturn, Uranus, Neptune, Pluto. See if you can come up with your own silly sentence to help you remember a list of names.

GARY MARTIN

Good Beat

Walk down the street. If you listen closely, you'll hear the rhythm of the city. You'll hear the beat of footsteps, the ring of telephones, car horns, police sirens, the clink of silverware at outdoor restaurants, the opening and closing of cash registers, and the car alarms. Then go to a quiet place, like your home or the library. Put two fingers of one hand on the underside of your other wrist. Close your eyes. You will probably feel your pulse, soft but steady. This is the rhythm of your body.

So what is rhythm? Rhythm is simply the pattern of a sound repeated. The reason why poetry is fun to read out loud is because poetry often is written to a rhythm. When you beat on a drum, you are making a rhythm. And when you talk over a drum beat, you're rapping. When hip hop musicians and rappers create new songs, they combine a good beat or rhythm with poetry and stories. Sometimes they put melodies underneath. You can be a rapper, too. Listen to the beat around you and tell your stories!

Buy Lunch, Not a Product

When you eat something, think about it: are you consuming food or advertising? Nutrition or an image? Do you think professional sports stars like Serena, Venus, Shaq and Kobe really eat candy bars and fast food to stay at the top of their game?

Companies spend BILLIONS of dollars every year marketing foods that are very low in nutritional value to kids like you. Children are very desirable customers for a company, because they can have you as a customer for a long time, from "cradle to grave."

Have you ever seen a commercial for Sunny Delight? The

way they talk about it, you would think that it's some sort of health food. In fact, Sunny Delight has barely any juice in it at all. It is mostly water, sugar, and added vitamins. Eating an orange is a much better way to get your Vitamin C and you will get fiber that will help you feel full for longer. In fact, eating more of all sorts of fresh fruits and vegetables is a great way to stay healthy and strong.

It's time to beat junk food advertisers at their own game. Want to learn more?

Check out
<http://pbskids.org/dontbuy-it/>. **Be smart, be healthy, and flourish!**

HARRY POTTER and the Half-Blood Prince: Harry Grows Up

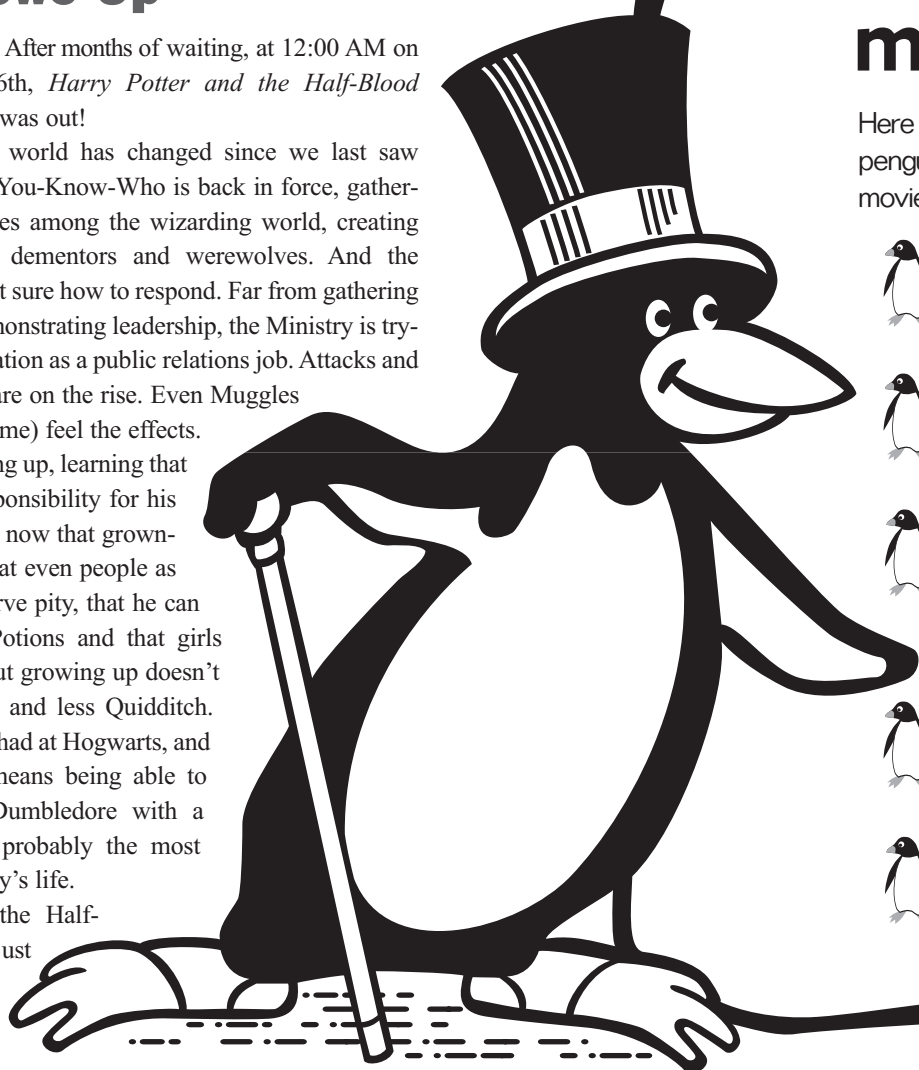

Finally! After months of waiting, at 12:00 AM on July 16th, *Harry Potter and the Half-Blood Prince* was out!

The world has changed since we last saw Harry. You-Know-Who is back in force, gathering allies among the wizarding world, creating grand alliances with dementors and werewolves. And the Ministry of Magic isn't sure how to respond. Far from gathering its own forces and demonstrating leadership, the Ministry is trying to manage the situation as a public relations job. Attacks and mysterious accidents are on the rise. Even Muggles (humans like you and me) feel the effects.

But Harry is growing up, learning that he must now take responsibility for his own future. He knows now that grown-ups make mistakes, that even people as rotten as Malfoy deserve pity, that he can actually do well at Potions and that girls aren't entirely icky. But growing up doesn't just mean more work and less Quidditch. There is still fun to be had at Hogwarts, and part of growing up means being able to Apparate and help Dumbledore with a very important task, probably the most important task of Harry's life.

You ask who is the Half-Blood Prince? You'll just have to read the book to find out.

PENGUINS make good people!

Here are a few things moviegoers learned about emperor penguins when they chilled off in theaters this summer at the movie *March of the Penguins*.

The men do their domestic chores. After the female emperor penguin lays the egg, it's the male who keeps the egg warm for months.

Penguins share. Emperor penguins huddle together to keep warm through winter storms and below-zero temperatures. Penguins in the middle rotate to the outside to give everyone a chance in the warmest spot.

Penguins help stop fights. In the movie, when a baby penguin dies, the mother tries to steal the baby of another mother. Other penguins intervene to stop the crime.

More on Penguins:

Scientists say that penguins are threatened by global warming caused by humans. When the ice thaws early, penguin chicks die. Less ice also means less food for penguins. They eat krill (like tiny shrimp) and krill live in the ice.

Tango is a young penguin at the Central Park Zoo. She has two dads: Roy and Silo. The couple adopted Tango as depicted in the new children's book *And Tango Makes Three*.

EATING ANTS

Not real ants, they're "Ants on a Log!"
To make this delicious snack:

- 1. Rinse off some celery sticks and cut them in shorter pieces
- 2. Use a spoon or knife to spread peanut butter in the hollow of the celery
- 3. Stick raisins in the peanut butter all the way down the log
- 4. Share your snack with friends!

DIY (Do It Yourself!) Your Own Garden

If you can't visit a community garden, you can still grow living things in your home. Seeds are everywhere. Beans like lentils, chickpeas, black beans, and red beans are all seeds that you can grow. Just be sure to buy them dry.

DIRECTIONS:

- 1. Place a bunch of seeds in a bowl or pan. Spread them out so that they aren't on top of one another.
- 2. Pour a bit of water in the container. You can be generous when you pour, but do not soak the plants so that they drown.
- 3. Place a piece of paper towel or a thin towel over the seeds. Make sure the towel is always a little wet. If it isn't, add water.
- 4. Within a few days you should have sprouts growing. You can eat them plain. They are very healthy. Or, throw them into a salad with other veggies.

MAKE IT GROW BIG: Get a pot (you can even recycle a milk or juice carton, but be sure to poke holes in the bottom) and some soil, and transplant a couple of your sprouts roots-first into the soil. Be sure to water your plant regularly and make sure it gets enough sunlight. If you don't ignore your plant, it will be sure to grow.

MY PET GRACE

Guinea pig Grace
My favorite pet.
When I'm alone
And feel upset
She cheers me up
My fluffy friend.

Poem by, William age 6 yrs
P.S. 100, Class 1-213

Mystery Person:

- Clue #1:** I was born on November 18, 1787 in New York State. My parents were slaves.
- Clue #2:** My name was originally Isabella Baumfree, but I changed it.
- Clue #3:** I worked with abolitionists (people who worked to end slavery) such as William Lloyd Garrison and Frederick Douglass. My memoirs were published in 1850.
- Clue #4:** I gave speeches calling for the end to slavery, advocating for the right of women to vote, and about my experiences as a slave. After the Civil War I worked to aid the newly freed southern slaves.

Answer: on the bottom of page 4.

SUPPORT indykids

This is the first ever issue of Indy Kids. The \$500 it took to print the first 5,000 copies came from the pockets of its founding volunteers. If we are to publish another issue, we need your support!

Indy Kids is a regular publication reaching kids in in New York City. Indy Kids volunteers are distributing the paper to kids through networks of progressive teachers, librarians and parents. We will produce a second issue in December 2005, and five issues in 2006.

Please support Indy Kids and help form the next generation of critical thinkers, progressive journalists and activists!
